

Release Note

Wincaps Q4/Q-Live V4.42.6

Author: R. Lees

Date: 13/7/23

1 Overview

This release comprises:

- Wincaps Q4 and Q-Live clients
- Wincaps Q4 DVD Builder, Video Indexer and Screener
- Wincaps Q-News, Wincaps Q-Live Gateway, Wincaps Q-Live File Server

2 Wincaps Q4/Q-Live Client Installation Procedure

****IMPORTANT****

- Host O/S Windows 10 or above.
- Valid licence file must be available for each client machine.
- User account performing installation must have full administrator rights on the local machine.
- Wincaps is not supported on a Mac.
- Wincaps clients are not supported on a virtual machine.

2.1 Prerequisites

Install the following prerequisites (if not already present) using the default options;

- DOT NET Framework Version 3.5 (client profile or full version) or Version 4/4.5
- MS Office Word full installation, Office 365, installed locally (for spell checking).
- Media Player (latest version appropriate to operating system)
 - **Note:** *If using Windows 10 N versions, you will need to download the relevant media pack before installing Wincaps Q4.*
- QuickTime is required if using the 'Offline Media' option for Video Playback of MP4 and MOV
- Sound Card recommended for use with MediaLooks MultiFormat video playback option
- External Graphics card recommended for Desktop PCs for video playback
- For Q-LiveASR Client components, Dotnet 5.0 is required and must be installed before Q-LiveASR Client components. Download from here [DotNet 5.0 Download Link](#)

2.2 Wincaps Q4/Q-Live Client

- Uninstall the current version of Wincaps Q4/Q-Live (if present) via add/remove programs.
- Install the new client using the exe installer and follow the instructions on the screen. When prompted, select "custom installation" if "Q-Live" feature is required (you will need to disable the "Wincaps Q4" feature as Q4 is installed by default).
- NB: For Q-Live services, including Q-News, contact support@broadstream.com

2.3 Licence installation

- As above for Licence Server. Licence Server must be Version 9 or above.
- Please speak to Broadstream Support for assistance with local licencing.

3 Changes in this release

3.1 Q4 and Q-Live

- New buttons to grab In and Out times as an alternative to the keystrokes.
- New keyboard shortcut to open the Shortforms management dialog. See Help>Reference>Q4 and Q-Live keyboard shortcuts>Window navigation/Modes.
- New option to allow snaking to break enforced row limits.
- Changed EBU STL Open Caption default export setting to not treat rows as double height.
- PAC Import vertical positioning improved.

3.2 Q4

- New option to display speaker name on the Video Window.

3.3 Q-Live

- Fixed bug when reopening a file and the ASR source not being available.
- Fixed bug in Q-Live with raised cued subtitle positions not being stored in the file.
- Turning ASR input off and then on maintains the Edit Cursor visibility and usability.
- Improved performance for handling large n32 files.

3.4 Q-News

- No changes in Q-News.

3.5 Bug Fixes

- Fixed bug with automatically setting keyboard to language option not being able to disable.
- Fixed bug with timecodes when inserting a WebVTT or SRT file into a W32 file.

4 Testing

- A limited test cycle has been run on this build.
- MOS testing has only been done with ENPS v9.3.4.4174 and DiNA v0.77.0 newsroom systems.
- iNews Testing on v6.3.1.7.
