

INTEGRATED PRODUCTION SOLUTIONS

Looking to captivate your audience with engaging live videos? Broadcast Pix offers powerful yet easy-to-use integrated production solutions, perfect for everyone from volunteers to experienced event producers. Start producing captivating content at the touch of a button!

Everything You Need to Create, Caption, and Stream Live Video

Key Features of Our Integrated Production Solutions

Customized Solutions for Every Production

Broadcast Pix systems are fully customizable and scalable to meet your specific production needs. From the compact 4-input StreamingPix to the 22-input GX Hybrid, you'll find the ideal solution for your budget, application, and expertise. Every system includes hybrid SDI and IP I/O, support for 1080p/60 and 4K, and built-in streaming, recording, and audio mixing, all within an intuitive interface.

Empower Your Production, Your Way

Easily control your production from a panel, tablet, phone, laptop, or touch-screen. Our smart software and user-friendly controls make it easy to switch cameras, add titles, and manage your entire production in real-time.

Innovative Automation for an Exceptional Experience

With over 20 years of live production expertise, Broadcast Pix offers advanced tools to streamline your workflow, from simple camera switching to one-touch chromakeying and virtual effects, helping you create professional-looking content effortlessly..

Integrated Captioning with VoCaption

Boost accessibility with VoCaption, which provides real-time automated live captioning to improve viewer engagement and inclusivity in every broadcast.

Experience the Future of Live Production

Which All-in-One System for Producing, Captioning, and Streaming Dynamic Live Content is right for you?

StreamingPix

The Easiest Streaming Solution for Compelling Video Content.

StreamingPix offers a seamless live production and streaming solution. With easy customization, full-motion video and audio monitoring, and a library of ready-to-use content, it ensures a personalized streaming experience. Explore our additional feature add-ons to meet all your live production needs. Start streaming with StreamingPix today!

The Hybrids

The Live Production Series for Today's Hybrid, Multi-format World.

Discover the Hybrids - our Live Production Series designed for today's hybrid, multi-format world. Packed with features and available in various I/O configurations, our products cater to local or remote productions effortlessly. Say goodbye to worries about multi-format and resolution-independent content with the Broadcast Pix Hybrid Series. Flexible and future-proof, our solutions come in three I/O configurations to handle all your video and IP-related needs.

The Roadie

For On-the-Go Live Production

The new Broadcast Pix Roadie is your solution for on-the-go live productions. Seamlessly integrating live streaming software and live captioning, Roadie transforms the live production experience. With its durable build and automated live captioning, Roadie offers convenience and sets new benchmarks. Experience simplicity and customization with Broadcast Pix Roadie.

Enjoy these must-have features, only from Broadcast Pix!

AI-Powered Live Captioning: Broadcast Pix systems now feature VoCaption, BroadStream's cutting-edge AI-powered software for live captioning. VoCaption transforms live audio into accurate, real-time captions with minimal delay—typically within 2-4 seconds. Fully integrated with Broadcast Pix Hybrid systems, this technology allows users to activate live captions with just a single click, achieving high accuracy rates in the mid-to-high 90s, depending on audio quality.

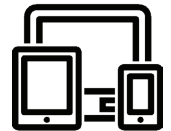

Key features include:

- **Custom Dictionaries:** Improve caption accuracy by adding unique names, terms, and regional expressions.
- **Alternate Word List:** Customize the display of specific words, including capitalization adjustments for on-air precision.
- **Bulk Minute Purchasing:** Purchase captioning time in bulk to match your specific needs, ensuring cost-efficiency.
- **Support for 50 Languages:** Easily add captions in multiple languages to broaden your audience.
- **EBU Timed Text File Creation:** Automatically generate subtitles for archiving, distribution, and online use.

Elevate the accessibility of your live broadcasts with VoCaption's seamless integration. For additional captioning, transcription, and translation needs, explore the [SubCaptioner online portal](#).

Broadcast Pix Commander™: The Commander UI is an advanced, browser-based control platform for Broadcast Pix integrated production switchers, enabling remote management of live productions from any location using a laptop, tablet, or smartphone.

Key features include:

- **Browser-Based Control:** Access and manage your Broadcast Pix system from anywhere using popular web browsers like Chrome, Safari, or Firefox.
- **Comprehensive Workflow Tools:** Control servers, robotic cameras, and other elements with an intuitive interface and full-motion viewing.
- **Versatile Operation:** Execute complex productions or manage PTZ cameras effortlessly with file-based macros for sophisticated on-screen combinations.
- **Ideal for Diverse Applications:** Perfect for government, religious, corporate, and educational settings, allowing control from anywhere, whether in the audience or remotely.

Error-Proof Your Productions with Broadcast Pix Macros: Simplify your workflow and create stunning effects with our unique media-aware macros. A standard feature on all Broadcast Pix integrated production solutions, this file-based memory system allows you to record a sequence of steps and play them out at the touch of a button. Our powerful macros can combine switcher moves with specific files, camera actions, and more. Streamline your production tasks with macro automation, enabling one-click execution of complex commands. Easily schedule playouts and automate productions for consistent, reliable broadcasts.

Broadcast Pix Customer Care Services and Support: Our customer care offers comprehensive support, including free software upgrades, hardware coverage, and priority access to our expert technical team. With access to our latest software releases, you can explore enhanced features and control options to ensure smooth, reliable live productions. We're committed to helping you maximize the value of your Broadcast Pix system and ensuring your productions run effortlessly.

Choose Your Control Method

BPview™ Configurable Multi-Viewer

Commander™ Browser-based Control UI

Size: 16.88 x 8.66 x 1.69 in
/ 42.9 x 22 x 5 cm

Weight: 4.54 lbs / 2.06 kg

Stream Deck Software Integration

Local Touch Control

Empower your production team with by integrating a touchscreen monitor into any system. Utilize the intuitive Commander or BPview interface for seamless operation. Perfect for adding operators during meetings, religious events, or educational sessions, enabling easy source management, macro execution, and more.

Remote Control

Experience the versatility of Commander Control Interface, providing intuitive control from tablets, smartphones, or touch-screen monitors. Design custom browser-based UIs or use provided templates for remote production management from anywhere with Internet access. Ideal for meeting coverage, worship services, education, or expanding operator capacity remotely.

Xbox Control

Unleash basic transition controls with Xbox Control, leveraging a game controller within the Commander UI for added convenience. Seamlessly control PTZ cameras with the joystick, enhancing production flexibility and accessibility.

MIDI Control

Customize your control environment with MIDI Control, enabling freedom to assign macros to any button on MIDI devices. Tailor your control setup to match your unique production requirements with ease.

Stream Deck Control

Stream Deck Control offers affordable tactile control with visual feedback for Broadcast Pix systems. Control your video sources, clips, graphics, cameras, macros, and more with fast-action command from any Elgato Stream Deck controller or iOS app. Choose from predefined profiles or customize your button layout. Experience enhanced control with icons, images, and tally feedback confirming each command.

Panel Control

The 750 Control Panel is perfect for complex productions. It integrates MIDI and Stream Deck software, enhancing control. With 12 direct source buttons and 12 more via the shift function, it offers flexibility. It provides easy access to six Keys, and includes dedicated controls for recording, streaming, and audio mixing. Additionally, it features a 3-Axis joystick for Camera Control with one-shot auto focus, and a Macro row for activating effects, making it ideal for fast-paced productions.

Ultimate Control

Upgrade to the ultimate control experience with our Hybrid Bundle Promotion! Each bundle includes a Broadcast Pix Hybrid Integrated Production System, a 750 hardware control panel, and an Elgato Stream Deck XL controller, giving you unmatched control for producing and streaming high-quality live video content. Elevate your production workflow with a Hybrid Bundle today!

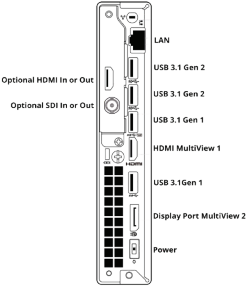

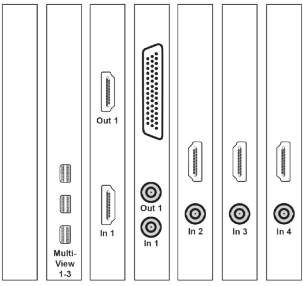

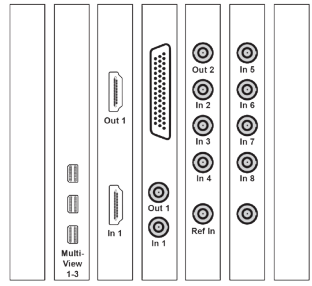

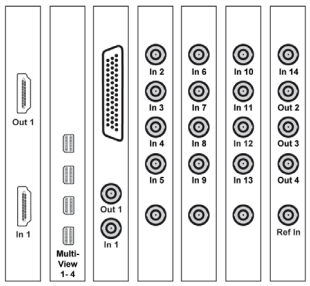

Integrated Production Solutions - Models

I/O & Hardware Acceleration

Choose from our six models of Broadcast Pix systems, including portable versions, all equipped with touchscreen and soft panel control, multi-format network inputs, clip store, full motion, and audio monitoring. **The hardware options selected will determine the physical inputs and outputs.**
